Type I Progress Report  
ERTS-A

- a. Title: Analysis study of multispectral data, ERTS-A,  
from an area in West Pakistan

ERTS-A Proposal No.: SR 181

- b. GSFC ID No. of P.I.: IN 396
- c. No problems.
- d. Analysis of color composites of principal image area is complete, a report was given at the March ERTS symposium at Lanham, and a manuscript was submitted for inclusion in the proceedings of that symposium.

I have not yet analysed the color composites of parts of adjacent images in the area of interest. Also, I have requested data tapes for the principal image area; these will be studied by ratio techniques, particularly in the area of known mineralization.

- e. No new results (see March 7 Type I report). The report submitted at the March symposium has been transmitted to the Geological Survey of Pakistan. The results of their field checks of proposed prospecting sites may be furnished us for evaluation of this remote sensing method.
- f. No new publications (ERTS symposium paper was included in March 7 Type I report).
- g. No change in any part of work plan is presently anticipated.
- h. No change in standing order forms.
- i. No change in ERTS Image Description forms.
- j. Data request forms were submitted on the following dates:

7 February 1973  
26 March 1973  
10 April 1973

- k. Not applicable.
